Bangalore, India

OBJECTIVE

Computer Science Engineering graduate with strong backend and full-stack development fundamentals in Java, Spring Boot, React.js, and MySQL, plus hands-on experience building RESTful APIs, relational database systems, and Git-based collaborative workflows. Seeking a Software Engineer / Backend Developer role to apply proven skills in application development, database integration, and problem-solving, with a commitment to clean code, continuous learning, and team-driven product delivery.

INTERNSHIPS AND PROFESSIONAL TRAINING

ORGGU Private Limited – Software Development Intern, Bangalore <i>Stack: Web Development, Mobile & Cloud Technologies, AI Tools (ChatGPT, Claude), Fork, Bitbucket, CloudCode</i> - Engaged as a Software Development Intern in a mentor-guided, learning-focused internship spanning web development, mobile app development, and cloud technologies - Working on real-world projects under mentor guidance, applying AI tools such as ChatGPT and Claude to support learning and development - Learning and using Fork (Git GUI client) and Bitbucket for source control and repository management, and CloudCode for cloud-based development workflows	Ongoing
Pentagon Space – Full-Stack Web Development Training (Course-Based Internship), Bengaluru <i>Stack: HTML, CSS, JavaScript, Java, MySQL</i> - Completed a structured, course-based training internship covering full-stack web development, building both frontend interfaces and backend logic as part of the curriculum - Practiced integrating MySQL databases into web applications, designing schemas and queries for reliable data persistence - Practiced debugging, code review, and backend development workflows as part of hands-on training exercises - Collaborated using a Git/GitHub feature-branch workflow, including pull requests and peer code review for version control	6 Months

MAJOR PROJECTS

Enterprise Human Resource Management System (HRMS) <i>Full Stack Developer Java 17, Spring Boot, Spring Security, JWT, React.js (Vite), Material UI, MySQL, Hibernate/JPA, Maven, REST APIs, Axios, Chart.js GitHub: github.com/kvathul7/hrms</i> - Developed an enterprise-grade HRMS platform with 12 modules — Dashboard, Employees, Attendance, Leave, Payroll, Recruitment, Performance, Departments, Holidays, Reports, Settings, and About — using Java Spring Boot, React.js, and MySQL - Implemented JWT-based authentication and role-based access control (RBAC) for 4 user roles: Admin, HR, Manager, and Employee, using Spring Security - Designed and consumed 15+ RESTful API endpoints across modules with Spring Boot, integrating them into a React frontend via Axios for seamless data flow - Designed and managed a normalized MySQL relational database schema with Hibernate/JPA for efficient, scalable data persistence - Created responsive analytics dashboards with real-time employee statistics using Material UI and Chart.js - Implemented CRUD operations, employee search & filtering, form validation, and secure role-based data access across all HR modules - Maintained project source control on GitHub with structured commits, enabling traceable, incremental feature development	June 2026
Network Intrusion Detection System (NIDS) <i>Developer Python, Data Visualization, Real-Time Analytics GitHub: github.com/kvathul7/NIDS</i> - Designed and implemented an end-to-end network security application with real-time traffic analysis and a live visualization dashboard - Delivered a fully functional solution from requirements gathering through deployment, covering the complete software development lifecycle (SDLC)	2025

EDUCATION

Shree Devi Institute of Technology, VTU <i>Bachelor of Engineering in Computer Science Engineering — 70%</i>	2026
CKNS GHSS Pilicode - Higher Secondary (Class XII) — 85% - SSLC (Class X) — 96%	

CERTIFICATIONS

- Java Full Stack Development — Pentagon Space, Bangalore | Duration: 6 Months | Completed

TECHNICAL SKILLS

- Programming Languages: Java - Databases: MySQL, Hibernate/JPA - Web Development: HTML, CSS, JavaScript, React.js (Vite) - Frameworks & Tools: Spring Boot, Spring Security, JWT, REST APIs, Axios, Chart.js, Git, GitHub (feature-branch workflow, pull requests), Fork, Bitbucket, CloudCode, VS Code, Eclipse, Maven - AI Platforms: ChatGPT, Gemini, Claude AI, Bolt.new, Cursor AI, GitHub Copilot - AI Skills: AI Prompt Engineering, AI-Assisted Application Development - Soft Skills: Communication, Leadership, Time Management & Multitasking
